

Community update

October 2025

National Grid has completed its Stage 2 consultation on proposals to upgrade the electricity network with new overhead line and substations between Grimsby and Walpole.

Between 11 June and 6 August 2025, we asked for your feedback on our refined proposals as part of our Stage 2 consultation. Thank you to everyone who attended our events and shared their thoughts with us.

Next steps

1

Reviewing feedback

We're reviewing all comments carefully, alongside ongoing environmental and technical surveys, to see where we can make design changes.

2

Weston Marsh consultation

Soon, we will present our detailed proposals for substation infrastructure at Weston Marsh, near Spalding, as part of a further consultation.

3

Ongoing engagement

We will work in partnership with organisations and people with a legal interest in land to enhance nature and wildlife along the route and mitigate effects.

4

Submit our DCO

In summer 2027, we expect to submit our Development Consent Order (DCO) application, including a Consultation Report detailing how all feedback has been considered.
